QUALITY STONE, TILE & ACCESSORIES

Quality We Stand On

Nova Tile and Marble Limited was established in 1964 to serve the commercial market in supply and installation of ceramic and quarry tiles, slate granite, epoxy flooring and wall systems. NTM has established a reputation for being a dependable supplier of quality dimensional stone and tile products for the construction industry. NTM's work is prominently displayed in the foyers, interiors and exterior cladding of many public and private buildings in the Atlantic Canadian region.

In the late 80's NTM recognized the need to establish a local marble and granite finishing facility. Stone could now be purchased as a raw material and be locally cut, ground and polished for use as a finished product for both the commercial and residential market.

NTM is Atlantic Canada's leading fabricator, installer and supplier of ceramic, quarry and natural stone flooring as well as other interior and exterior tile and dimensional stone applications. NTM also fabricates and installs cut to size stone for counter tops, fireplaces, tabletops and other decorative applications.

State of the Art Fabrication

Nova Tile and Marble Limited combines state of the art fabrication facilities with traditional hand craftsmanship. With over 30 years in the stone and tile business NTM brings experience and quality workmanship to all of our projects.

All of our manufacturing is done on site, locally in Atlantic Canada allowing us flexibility and control over the fabrication process. This can save time and money compared with fabricators in other regions.

Our experienced estimators can assess and measure your project then provide you with a detailed quote and time line for fabrication and installation of your stone or tile. They coordinate with and supervise the craftsmen who will be fabricating and installing your stone. This close contact between the project manager and the craftsmen minimizes delays and costly mistakes.

Accessories

Nova Tile and Marble Limited carries a full line of kitchen and bathroom accessories and fixtures. Visit our show room to see samples and available products.

We also have samples of specialty tiles to accent your interior designs.

NTM carries products from these quality manufacturers:

Frequently Asked Questions

Will my stone match the sample?

Stone is a natural product and as such it has variations in tone, colour, granularity and pattern. These variations are the source of natural stone's appeal and beauty. Because of this, a sample may not exactly match a slab or finished product. The samples should give a general idea of the colour, finish and pattern of the stone you choose. We encourage you to come into our showroom and view the actual stone slabs. We have over 50 varieties in stock.

Is it normal for my stone to have tiny cracks and pits?

Some types of stone do have veining and crystallizations that can appear to be cracks or pits but are actually a natural property of the stone. Stone forms over thousands of years. These slow processes lead to many variations in structure, colour and pattern. It is precisely these variations that make stone such an appealing material. We encourage you to ask about these properties before you make your choice of stone.

How easy is it to scratch natural stone?

Some stones, such as Marble and Soapstone are easier to scratch than others. Granite however is one of the most difficult stones to scratch. It can be scratched by diamonds, other pieces of granite or hardened steel, but under normal intended household use will not scratch. We do not recommend cutting or chopping directly on your granite so as to avoid undue wear and tear or scratching on the surface of the stone.

Will seams show?

Seams are the joints where two pieces of stone meet. Seams are one of the few disadvantages of stone countertops compared to manmade materials. We do everything we can to avoid or reduce the number of seams in a job. Then, we do everything we can to make the seams less noticeable. We use an epoxy to glue and seal the seam and colour the epoxy to make it blend with the stone.

How do I care for my stone?

Natural stone is easy to care for. It is sealed before installation and can be resealed as needed. Most stone can be cleaned with a mild detergent and water. Avoid abrasive cleaners or scrubbing pads. NTM provides cleaner/polisher with each purchase.
